Vertex Marine 100% Recycled PET Display Textile

Vertex Marine is a 100% polyester fabric with one distinct difference. It's made from recycled plastic bottles!

Vertex Marine efficiently conserves natural resources and reduces the burden of single use plastics on nature - especially marine life.

This is all done without losing any of the qualities of a virgin polyester yarn giving you just as good quality print finish when you use dye-sublimation, UV-C or Latex printers.

It's arguably the most eco-friendly print material, the grand format print trade has ever seen.

Applications

- Large tube displays
- Promotional table cloths
- Exhibition backdrops
- Frontlit applications

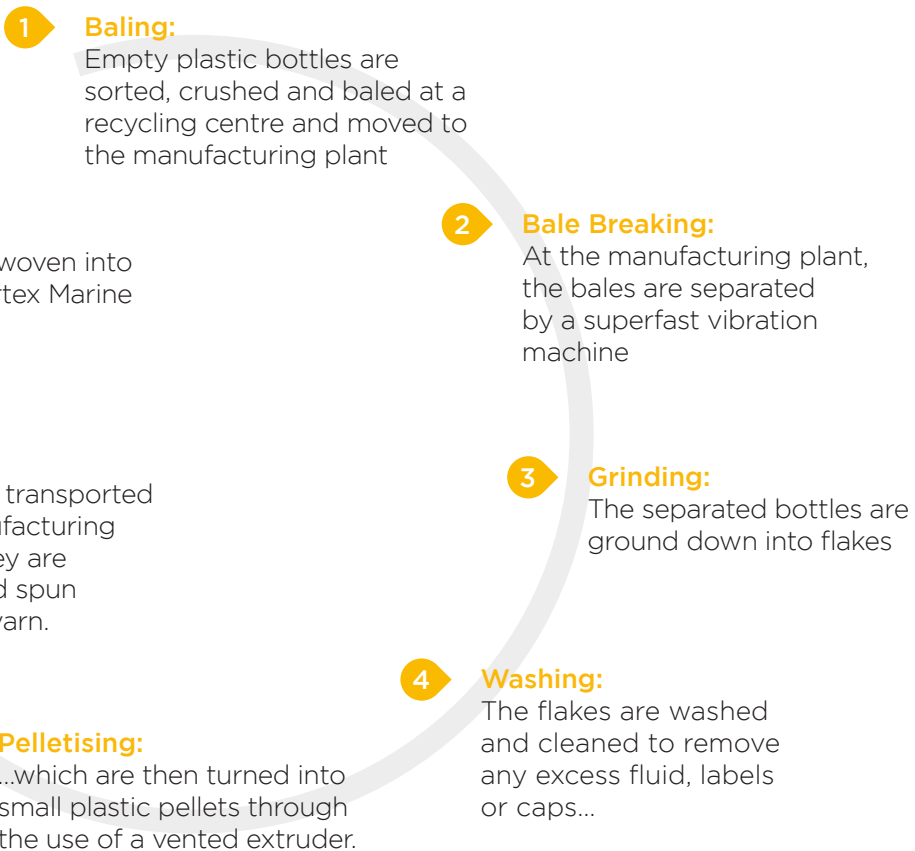

Just remember, when you buy a full roll of Vertex Marine, you're saving over 3,000 bottles from the ocean!

How it works...

Recycling Process

FUN FACT!

It takes 10-12 bottles to make 1 square meter of material!

Order Code	W (mm)	L (m)	Weight (g/m ²)	Fire Rating	Bottles saved from the Ocean
