

Reeded Glass Film 70mic

Features & Benefits:

- 70mic thickness provides durability, strength and flexibility for various applications.
- Specifically made to mimic the appearance of reeded glass, adding an elegant and textured look to windows and glass surfaces.
- Easy to install and is resistant to wear and tear.
- Can be applied to a wide range of glass surfaces, including windows, partitions, and doors, offering privacy without sacrificing natural light transmission.

Order Code	W (mm)	L (mm)	Reed width (mm)
INV214432	1520	50	13
INV214429	1520	50	15

Property	Result
Thickness (mic)	70
Width (m)	1.52m
Haze (%)	89.2
UVR (%)	40
IRR (%)	28.6
180° peel adhesion to glass	>400gf
Retention	>800h
Acid resistance	<4.0
Alkali resistance	<4.0
Alkali resistant	-5°C to 35°C

Maintenance:

- Designed to be wet applied. Will not be able to be moved after 5 days following application.
- Do not paste any other adhesive products onto the vinyl. It will impair the reeded effect of the vinyl.
- We recommended applying this vinyl onto transparent or coloured flat glass
